

Think Education Forward

"St. St. Cyril and Methodius", Sveti Vlas, Bulgaria

Think Forward - Galina Milkova, Nedko Nikolov, Monika Marinova, Kristina Yaneva

Think Education Forward is a strategy for transforming a 20th century Bulgarian school into a 21st century educational institution within the framework of 8 projects implemented in a period of 8 years. Funded by the delegated budgets of the school, this step-by-step modernisation is an example of social innovation driven by the self-initiative of school administration and architects. The specific in this project is only the name of the transformed school – "St. St. Cyril and Methodius". However, the principles applied are universal for any Bulgarian school about to embark on the path of change.

-  Principle of Openness
-  Principle of Transparency
-  Principle of Connectivity
-  Principle of Spatiality
-  Principle of Accessibility
-  Principle of Flexibility
-  Principle of Equality
-  Principle of Experience
